Summary

K3 Software Engineering student at CMC University with a full scholarship. Passionate about building interactive web applications, game development, and AI integration. Experienced in React, Flutter, Supabase, Next.js, .NET, and Computer Vision.

Education

CMC University, Bachelor's Degree in Software Engineering — Sept 2024 – June 2027

- GPA: 3.5/4.0 (As of Summer 2026) · Full scholarship recipient
- Member of the Olympic IT team and the Scientific Research team

Nguyen Trai High School for the Gifted - Hai Duong, High School Graduate in Foreign Language Major — Sept 2021 – June 2024

Projects

PMA - B2B LMS Platform for Corporate Training — 2026

- Built a custom training management system running in production for corporate classes, with auto-scheduling that skips public holidays.
- Delivered a 5-stage teaching-assistant checklist, attendance, per-class document library, question bank, and graded quizzes.
- Integrated Google Calendar, Gmail, and Drive; 5-role access control; Docker-based CI/CD auto-deployment.
- Technologies: Next.js, PostgreSQL, Docker CI/CD, Google APIs

DynaTour - Real Estate 3D Tour Solution from Mobile Video — 2026

- Automatically converts walkthrough videos from mobile phones into interactive and vivid 3D tours for real estate.
- Facilitates remote space viewing, optimizing conversion rates and accelerating deal closure.
- Technologies: React, WebGL / Three.js, Computer Vision, 3D Reconstruction

Runny AI - Intelligent Running Assistant with AI Coach — 2025 - 2026

- Developed a personal running assistant combining training data tracking, AI Coach consultation, and community.
- Implemented Strava API synchronization, Pace/Heart Rate visualization, and shoe wear monitoring (Shoe Tracker).
- Technologies: Flutter, Supabase (Database, Auth, Edge Functions), AI Coach

Smart Hospital Management System — 2025

- Developed a comprehensive full-stack hospital information system to digitize operational workflows.
- Integrated AI to support medical record summarization, automated diagnosis suggestions, and clinical decisions.
- Technologies: PostgreSQL, Supabase, Next.js, FastAPI, AI

AI-Based Personalized Learning Web App — 2025

- Automated exam and assignment generation, personalizing the learning experience for students using AI.
- Provided teacher dashboards for class management, progress tracking, and data-driven teaching decisions.
- Technologies: Angular, .NET, MongoDB, AI

Awards

- **Top 10, NEU Startup Olympiad 2026** - DynaTour project, National Economics University (2026)
- **Consolation Prize (Division B), CSCV 2026** - Vietnam Student Cybersecurity Contest, jeopardy CTF; team CMC.CBS placed #10 in the finals with 2,080 points (2026)

Skills

Programming Languages: Python, JavaScript, TypeScript, Dart, Java, C++, C#, HTML/CSS
Frameworks & Libraries: React, Flutter, Next.js, Django, Node.js, .NET, Tailwind CSS, OpenCV, NumPy, Three.js
Databases & BaaS: PostgreSQL, Supabase, MongoDB, SQL Server
Tools & Platforms: Git, GitHub, Docker, VS Code, Unity, Unreal Engine, Adobe Photoshop
Languages: English (IELTS 8.0), Vietnamese (Native)
Certifications: Samsung Innovation Campus (SIC) AI Certification, NVIDIA DLI Deep Learning
