Summary

Full-stack Developer & AI Engineer (CMC University, full scholarship, IELTS 7.5) with a hands-on, product-driven mindset and a solid systems foundation. Author of a B2B LMS running in production for real businesses, lead engineer of the 3D/AI project DynaTour (Top 10, NEU Startup Olympiad 2026) and captain of the team that placed Top 10 at the CSCV 2026 finals.

Education

CMC University, Bachelor's Degree in Software Engineering — Sept 2024 – June 2027

- GPA: 3.5/4.0 (As of Summer 2026) · Full scholarship recipient
- IELTS 7.5

Nguyen Trai High School for the Gifted - Hai Duong, High School Graduate in Foreign Language Major — Sept 2021 – June 2024

Projects

PMA - B2B LMS Platform for Corporate Training — 2026

- Lead developer (full-stack & DevOps) of a production LMS for a training company and its corporate clients, with 10+ training classes and 30+ instructors and staff; turned requirements gathered with the BA into features.
- Auto-scheduling that skips holidays, 5-stage TA checklist, attendance, document library, question bank, graded quizzes, 5-role access control; Google Calendar/Gmail/Drive integration; Docker CI/CD.
- Technologies: Next.js, PostgreSQL, Docker CI/CD, Google APIs · Link: b2bpmp.io.vn

DynaTour - Real Estate 3D Tour Solution from Mobile Video — 2026

- Lead engineer in a team of 4. Top 10, NEU Startup Olympiad 2026.
- Built the FastAPI backend on Cloud Run, Supabase Postgres (RLS, idempotent point-deduction RPC) and a serverless GPU 3D Gaussian Splatting pipeline with a CPU video-filter step to cut GPU cost.
- Technologies: FastAPI, Supabase, 3D Gaussian Splatting, Serverless GPU · Link: dynatour.io.vn

Pair Time - Coding Companion Game (itch.io) — 2026

- Built and released a cozy Windows simulation in Godot .NET and C#: the character reacts to hooks from coding agents (Claude Code, Codex, OpenCode) running in embedded ConPTY terminals, plus a transparent always-on-top overlay mode.
- Technologies: Godot .NET, C#, ConPTY, Win32 · Link: k4spi4n.itch.io/pair-time

Runny AI - Intelligent Running Assistant with AI Coach — 2025 - 2026

- Database and backend/AI owner in a team of 4 for a Flutter running assistant: Strava API sync, LLM orchestration on Edge Functions across 4 providers (incl. a self-hosted model) with circuit breaker and retry.
- Technologies: Flutter, Supabase, LLM Routing, Strava API · Link: runny-ai.onrender.com

Smart Hospital Management System — 2025

- Solo full-stack and AI-backend developer; AI medical-record summarization, diagnosis suggestions and an in-record chat assistant.
- Technologies: Next.js, FastAPI, Supabase (PostgreSQL), LLM

Awards

- **Consolation Prize (Division B), CSCV 2026** - Vietnam Student Cybersecurity Contest, jeopardy CTF; team captain of CMC.CBS, #10 of 47 finalist teams (selected from 334 domestic and international teams) with 2,080 points (2026)
- **Top 10, NEU Startup Olympiad 2026** - DynaTour project, National Economics University (2026)
- **Consolation Prize, CMC University Undergraduate Research Conference 2025-2026** (2026)

Skills

Programming Languages: Python, JavaScript, TypeScript, Dart, Java, C++, C#
Frameworks & Libraries: React, Flutter, Next.js, FastAPI, Django, Node.js, .NET, Tailwind CSS, PyTorch, OpenCV, NumPy
Databases & BaaS: PostgreSQL, Supabase, MongoDB
Tools & Platforms: Git, Docker, Unity, Godot
Certifications: Samsung Innovation Campus (SIC) AI Certification, NVIDIA DLI Deep Learning
