Summary

K3 Software Engineering student at CMC University with a full scholarship. Passionate about building interactive web applications, game development, and AI integration. Experienced in React, Flutter, Supabase, Next.js, .NET, and Computer Vision.

Education

CMC University, Bachelor's Degree in Software Engineering — Sept 2024 – June 2027

- GPA: 3.5/4.0 (As of Summer 2026) · Full scholarship recipient

Nguyen Trai High School for the Gifted - Hai Duong, High School Graduate in Foreign Language Major — Sept 2021 – June 2024

Projects

PMA - B2B LMS Platform for Corporate Training — 2026

- Lead developer (full-stack & DevOps) of a production LMS for 5+ companies, 10 classes and 20-30 instructors and staff; turned requirements gathered with the BA into features.
- Auto-scheduling that skips holidays, 5-stage TA checklist, attendance, document library, question bank, graded quizzes, 5-role access control; Google Calendar/Gmail/Drive integration; Docker CI/CD.
- Technologies: Next.js, PostgreSQL, Docker CI/CD, Google APIs

DynaTour - Real Estate 3D Tour Solution from Mobile Video — 2026

- Lead engineer in a team of 4. Top 10, NEU Startup Olympiad 2026.
- Built the FastAPI backend on Cloud Run, Supabase Postgres (RLS, idempotent point-deduction RPC) and a serverless GPU 3D Gaussian Splatting pipeline with a CPU video-filter step to cut GPU cost.
- Technologies: FastAPI, Supabase, 3D Gaussian Splatting, Serverless GPU

Runny AI - Intelligent Running Assistant with AI Coach — 2025 - 2026

- Database and backend/AI owner in a team of 4 for a Flutter running assistant (Pace/Heart Rate charts, Shoe Tracker, AI Coach).
- Strava API sync; LLM orchestration on Edge Functions across 4 providers (incl. a self-hosted model) with circuit breaker and retry.
- Technologies: Flutter, Supabase, LLM Routing, Strava API

Smart Hospital Management System — 2025

- Solo full-stack and AI-backend developer; AI medical-record summarization, diagnosis suggestions and an in-record chat assistant.
- Technologies: Next.js, FastAPI, Supabase (PostgreSQL), LLM

AI-Based Personalized Learning Web App — 2025

- Backend developer (.NET, MongoDB): auto-generated exams and assignments, personalized learning paths, teacher dashboards.
- Technologies: Angular, .NET, MongoDB, AI

Awards

- **Consolation Prize (Division B), CSCV 2026** - Vietnam Student Cybersecurity Contest, jeopardy CTF; team captain of CMC.CBS, #10 of 47 finalist teams (selected from 334 domestic and international teams) with 2,080 points (2026)
- **Top 10, NEU Startup Olympiad 2026** - DynaTour project, National Economics University (2026)
- **Consolation Prize, CMC University Undergraduate Research Conference 2025-2026** (2026)

Skills

Programming Languages: Python, JavaScript, TypeScript, Dart, Java, C++, C#, HTML/CSS
Frameworks & Libraries: React, Flutter, Next.js, FastAPI, Django, Node.js, .NET, Tailwind CSS, PyTorch, OpenCV, NumPy
Databases & BaaS: PostgreSQL, Supabase, MongoDB, SQL Server
Tools & Platforms: Git, GitHub, Docker, VS Code, Unity, Unreal Engine, Adobe Photoshop
Languages: English (IELTS 7.5), Vietnamese (Native)
Certifications: Samsung Innovation Campus (SIC) AI Certification, NVIDIA DLI Deep Learning
